Senior Network Administrator | Systems Administrator

Network and Systems Administrator with 20+ years of experience supporting, managing, and improving IT infrastructure across on-premises and cloud environments. Experienced in network and systems administration, Microsoft Azure, Entra ID, Microsoft 365, Active Directory, Group Policy, and Windows Server. Strong focus on identity and access management, Conditional Access, MFA, infrastructure security, and Microsoft cloud services. Hands-on experience with PowerShell automation, infrastructure deployments, system upgrades, and troubleshooting, with an emphasis on building secure, reliable, and efficient IT environments.

Areas of Expertise

- Network Security
- Multi-Factor Authentication
- Azure Active Directory
- Microsoft Intune / Endpoint Manager
- Mobile Device & Application Management (MDM/MAM)
- Modern Endpoint Provisioning with Intune & Autopilot
- Cloud Security
- Azure Administration
- Application Packaging
- Server Administration
- Virtualization & Servers
- Identity & Access Management (IAM)
- Disaster Recovery
- Backup & Recovery
- Network Administration
- DNS & Domain Management
- Wireless Technologies / VoIP
- PowerShell Automation

Technical Proficiencies

Platforms:	Microsoft Windows Server (AD, DNS, DHCP, SMTP, FTP, VPN, TCP/IP), Microsoft Azure, Azure Active Directory (Entra ID), Conditional Access, Microsoft Intune, Autopilot, Microsoft Teams, Exchange Online, VMware vSphere, pfSense Firewall, Linux (Ubuntu Server), Microsoft Hyper-V, Android, iOS
Tools & Technologies:	Sophos Central (Email Security, Endpoint Protection), Proofpoint Email Protection, Cisco Umbrella, Mimecast, Okta, CrowdStrike, Arctic Wolf, KnowBe4, ConnectWise RMM, ManageEngine, Dell Image Assist, Quest Rapid Recovery, Veeam Backup & Replication, Veeam Backup for Microsoft 365, SCCM / MECM, Microsoft Exchange, SharePoint, OneDrive for Business, Microsoft Office Suite, PowerShell, UniFi Network Controller, Git, Group Policy, DMARC
Hardware:	Cisco Networking Equipment, Meraki Appliances, UniFi Switches and Access Points, Aruba Switching and Wireless, FortiGate Firewalls

Career Experience

Jeanne D'Arc Credit Union, Lowell, MA — **July 2026 – Present**
Systems Administrator

Manage and support a hybrid Microsoft environment spanning cloud and on-premises infrastructure, with a primary focus on Microsoft 365, Entra ID, identity and access management, security, and systems administration. Administer Conditional Access, MFA, OneDrive for Business, Teams, Active Directory, Group Policy, and Windows Server while implementing secure access controls and configurations. Lead cloud and infrastructure initiatives, system deployments, and upgrades while leveraging PowerShell automation to improve administrative efficiency. Support VMware and enterprise networking, including VPNs, firewalls, switches, and wireless infrastructure.

- Administer hybrid enterprise infrastructure spanning on-premises and cloud environments, ensuring high availability, security, and performance across critical business systems.
- Administer and troubleshoot Microsoft Entra ID Conditional Access policies, supporting secure access controls, authentication requirements, policy exclusions, and application access across the enterprise.
- Lead the phased implementation of Microsoft OneDrive for Business across the enterprise, including Group Policy configuration, access controls, pilot deployments, troubleshooting, and staged departmental rollout.
- Implemented and secured Microsoft Teams guest and external access, configuring collaboration security controls and Microsoft Entra Conditional Access policies to enforce MFA for external identities, with group-based exclusions for approved non-MFA access scenarios.
- Configured and deployed Microsoft Entra ID Company Branding, customizing organizational sign-in experiences, authentication page elements, and visual identity across Microsoft 365 and Entra-integrated services.

- Led the migration from legacy Microsoft LAPS to Windows LAPS, modernizing local administrator password management through Active Directory and Group Policy while enforcing stronger 16-character password requirements across enterprise endpoints.
- Configured Microsoft Entra ID Privileged Identity Management (PIM) and Role-Based Access Control (RBAC) to manage privileged administrative access, enforce least-privilege permissions, and strengthen identity security across the Microsoft cloud environment.
- Develop PowerShell scripts and automation workflows to streamline administrative tasks, reporting, system configuration, and operational processes across the enterprise environment.

Hans Kissle, Haverhill, MA **February 2025 – April 2026**
Senior Network Administrator

Managed a hybrid enterprise infrastructure, supporting both on-premises and cloud platforms to ensure secure, efficient, and reliable IT operations. Oversaw and optimized network infrastructure, including the installation, configuration, and maintenance of routers, switches, and firewalls. Responded to technical support requests and troubleshot network and system issues to minimize downtime. Administered Microsoft Azure and Active Directory, supporting identity management, security, and system performance. Deployed and maintained virtual servers, configured software, and resolved hardware and peripheral issues. Evaluated network performance, implemented infrastructure improvements, and coordinated system upgrades to minimize business impact. Provided technical guidance and training to team members, promoting operational efficiency and adherence to security standards.

- Managed core network infrastructure, including routing, switching, VPNs, VLANs, DNS/DHCP, and pfSense firewalls to maintain high availability and security.
- Administered Microsoft Azure, Entra ID (Azure AD), Conditional Access, and MFA for identity and access management across hybrid environments.
- Led Microsoft 365 services, including Exchange Online, SharePoint, Teams, and licensing automation using PowerShell and Power Automate.
- Oversaw Intune MDM/MAM, Apple Business Manager integration, and Autopilot provisioning for Windows 365 Cloud PCs and mobile devices.
- Deployed and maintained physical and virtual servers using Hyper-V and Ubuntu Server, with Veeam for backup and disaster recovery.
- Built and onboarded helpdesk infrastructure from scratch — ConnectWise RMM, PSA, ScreenConnect, Auvik network monitoring, and BrightGauge reporting dashboards.
- Led and designed the migration from SCCM/MECM to Intune with zero-touch Autopilot provisioning and Entra ID device modernization, transitioning from co-managed to cloud-native endpoint management.
- Developed PowerShell scripts and workflows to automate administrative tasks, reporting, and compliance enforcement.

Skyterra Technologies, Nashua, NH **September 2021 – February 2025**
Systems Analyst

Coordinated with users and managed services clients to provide Tier 3 technical support across desktop, endpoint, network, server, and cloud environments. Supported and administered Microsoft 365 services and technologies, including Azure, Entra ID, Intune, Exchange Online, SharePoint, OneDrive for Business, Teams, BitLocker, and MFA, along with Mimecast, Cisco Umbrella, and Meraki infrastructure. Monitored servers and backup systems, performed file restorations, and investigated and resolved network and system issues. Administered user accounts, groups, permissions, and access while supporting endpoint deployments, operating system migrations, and device management. Participated in and led infrastructure projects, system deployments, testing, and troubleshooting to maintain reliable and secure IT operations.

- Provided Tier 2 and Tier 3 support for Azure, Intune MDM, MFA, Office 365, Azure AD, Teams, SharePoint, and OneDrive, resolving complex technical issues through phone, email, chat, and web conferencing.
- Administered Active Directory and Group Policy, managing OUs, user accounts, security configurations, and GPOs to strengthen system security, standardize configurations, and maintain efficient directory services.
- Administered Intune Endpoint Management to streamline device provisioning, deploy security policies, and improve endpoint performance across organizational systems.
- Led software packaging and deployment initiatives via Intune for tools such as Zscaler, CrowdStrike, Keeper, and custom Remote Monitoring and Management (RMM) solutions, ensuring seamless system compatibility.
- Designed and implemented Intune configuration policies to enforce security measures, including application blocking, browser restrictions, and long-path support.
- Automated routine administrative tasks with PowerShell scripting, including application removal and enterprise-wide system configuration optimization.

- Strengthened physical and digital security through conditional access policies, PIN-based access processes, and FOB/gate/camera system management.
- Deployed Microsoft LAPS for tenant-wide credential management, improving password security and auditability.

General Investment & Development (GID), Boston, MA **April 2011 – August 2021**
Network Technician

Managed and supported network, systems, and endpoint infrastructure across corporate and remote locations. Installed, configured, and maintained routers, switches, wireless access points, VPN connectivity, and other network technologies while monitoring performance and resolving connectivity issues. Administered Active Directory, user accounts, permissions, and Windows systems, and oversaw Windows imaging and deployment for both business and kiosk systems. Managed hardware and software deployments, system upgrades, endpoint migrations, and infrastructure improvements while providing escalated technical support for network, system, and end-user issues.

- Administered Active Directory user accounts, created email mailboxes, managed network share access, and maintained group-based permissions.
- Built and maintained standardized Windows images for business systems and developed a locked-down Group Policy kiosk image that became the enterprise standard across all properties.
- Deployed and configured Meraki MX/MR infrastructure for site-to-site VPN connectivity and Cisco ISR routers with IP phones for VoIP across multiple sites.
- Monitored and supported Cisco Meraki network infrastructure across the Southwest region, proactively diagnosing and resolving outages, wireless connectivity issues, security configurations, and switching problems.
- Played a key role in the successful company-wide rollout of tablets, mobile devices, OneDrive cloud storage, and VeraCrypt full-disk encryption.
- Supported the adoption of Microsoft Teams and OneDrive, providing onboarding and end-user support to ensure seamless transition to cloud collaboration tools.
- Served as the final escalation point for complex network, system, hardware, and software issues, providing advanced remote and on-site troubleshooting and resolution.
- Configured and supported LAN infrastructure, including access points, switches, and routers at both headquarters and remote properties.

Additional Experience

Additional IT experience in network administration, systems support, and desktop support roles, 2003–2011.

Education

Associate of Arts, Information Technology / Networking (Coursework Completed), GPA: 3.97
University of Phoenix, Phoenix, AZ

Professional Training & Certifications

Certificate in Cyber Security (CSC) – Mount Wachusett Community College – Selected courses completed

CCENT/CCNA Coursework Completed – New Horizons Computer Learning Centers – 2013

Network Engineering Management Certificate – Xintra Technical Institute – 2002

Network Professional and Helpdesk Specialist Certificate – Xintra Technical Institute – 2002

A+ Certified Technician

Dell Certified Systems Expert
